

Add Nutrition Tracking to MyBento's Wellness Module

A WhatsApp-based calorie and macro tracker that integrates seamlessly into MyBento's employee benefits platform — zero app downloads, instant engagement.

The Opportunity

MyBento already consolidates employee benefits into one engaging hub. Adding nutrition tracking strengthens your **Employee Wellness** module with a tool employees will actually use — because it lives in WhatsApp, not another app they'll forget about.

For MyBento

- New revenue stream (markup to clients)
- Strengthens wellness module offering
- Higher employee engagement metrics
- Differentiator vs. competing platforms
- Zero development cost — we handle everything

For MyBento's Clients

- Employees get a nutrition tracker at no extra effort
- Weekly wellness reports for HR
- Supports corporate health initiatives
- 95%+ of employees already use WhatsApp
- Boosts benefits engagement (your 95% stat goes higher)

How It Works

It's just WhatsApp. Employees text what they ate — or snap a photo — and get instant calorie and macro tracking. Morning check-ins, evening summaries, coaching mode, weight tracking. No app download. No login. No friction.

Employee Experience

Employee clicks a join link (unique per company).
Texts the bot like a friend: "two eggs on toast" or
sends a photo. Gets instant tracking with SA-
specific food data.

Corporate Integration

Each MyBento client gets a unique referral code.
Monthly reports show active users, average
calories, participation rates. Data feeds into
MyBento's wellness dashboard.

✔ Features

- ✔ WhatsApp calorie & macro tracking

✔ Morning & evening check-ins

✔ Coaching mode (nutrition Q&A)

✔ Exercise logging

✔ Per-company referral codes

✔ Custom meal plan support
- ✔ AI photo food recognition

💰 Pricing

ITEM	PRICE
Per active employee, per month	R7.50
Setup & onboarding per client	Included
Monthly usage reports	Included
Custom food database setup	Included
Ongoing support & updates	Included
Capacity	Up to 1,000 users

Active user = sent at least 1 message in the billing month. MyBento sets their own markup to clients.

Revenue example: If MyBento charges clients R15/employee and 300 employees are active, that's R4,500/mo revenue, R2,250/mo cost to FitSorted = **R2,250/mo profit for MyBento** with zero

development or maintenance.

RESPONSE TIME

Live since March 2026. Built in South Africa, for South Africans. Database includes Woolworths, Checkers, Nando's, Steers, KFC, Kauai, Spur, Ocean Basket, and hundreds more local items.

Integration Path

- 1 Pilot:** Enable for 1-2 MyBento clients (2 weeks, free trial)
- 2 Measure:** Track engagement, gather employee feedback
- 3 Scale:** Roll out to all MyBento clients via wellness module
- 4 Deepen:** API integration into MyBento dashboard (optional)

Let's Run a Pilot

Pick one or two of your clients. We'll set up FitSorted in 48 hours, free for 2 weeks. If employees love it, we scale. If not, no cost, no commitment.
